Subject: Microsoft Settlement

I personally feel that the current settlement offer for the Microsoft Anti-Trust case is a complete joke. I am absolutely NOT in favor of the current settlement as it does little to nothing to curb the predatory practices of Microsoft. Imposing far more demanding restrictions/penalties will be far more helpful to the computer industry as a whole in the future. Having Microsoft as a monopoly(which it is by the courts own ruling) is not only dangerous to the growth and innovation of the computer industry but is also fundamentally dangerous to the United States should Microsoft suddenly fail due to attack, mismanagement, or otherwise.
